

ST. PAUL'S SCHOOL

1831-84

The Headmaster

"Some of our favorite things" - One of my all time favorite things is not a thing at all. It is St. Paul's School!

There is nothing more gratifying than to see our school growing bigger and better as each year passes. This year our growth has brought us our first Eighth Grade class. It has not always been an easy year for these pioneer students, as both their teachers and they can tell you. It has been a year for growing, however, and that has brought lots of joyful as well as painful times.

Life carries that combination of times both hard and easy, confused and clear, painful and joyful. Our Jewish and Christian ancestors have told us that all of them together provide the meaning for our journey through life. What matters is that God is our companion and helps us to be true companions one of another through it all.

To our graduates, therefore, we extend our congratulations and our wish that they will continue to grow in their life journeys.

Kathy Cooper's life journey will take her into further graduate studies next year. She can leave us knowing that she has made an outstanding contribution to our growth these past years. We shall miss her but most of all we thank her and wish her every success.

A handwritten signature in cursive script that reads "David Forbes".
